

PRODUCT DATA SHEET

19" Overhead Cable Pathway Frame

Introduction :

Introducing our 19" Open Frame Mounted Overhead solution, designed to free up valuable rack space by deploying copper and fibre terminations overhead. This innovative design optimizes space utilization and reduces the risk of working inside a live network rack during expansions.

Applications :

Ideal for data centres, both Edge and Colocation, this overhead solution enhances space efficiency and simplifies network management. By relocating terminations overhead, it streamlines the installation and maintenance processes, making it perfect for dynamic and high-density environments.

Key Benefits :

- Rack mountable open frame design
- Frees up valuable rack space by utilizing overhead deployment
- Supports up to 48 Cat6a copper connections
- Accommodates 144 pre-terminated duplex LC ports
- Optimizes space utilization in data centres
- Reduces risk during expansions by avoiding work inside live network racks
- Simplifies termination and maintenance processes
- Ideal for high-density environments such as Edge and Colocation data centres
