

PRODUCT DATA SHEET

1U 24 Port Shielded Modular Patch Panel Empty

Introduction :

Introducing our Shielded 24-Port Modular Patch Panel, designed for Cat6A STP Keystone. This panel offers superior protection against EMI and RFI, ensuring reliable and secure data transmission. Ideal for high-interference environments such as production facilities, warehouses and data centres.

Features :

- **High Port Density :** A 24-port modular patch panel provides 24 ports in a compact form, allowing for efficient use of space in network racks or cabinets, ideal for structured cabling environments.
- **Modular Design :** The panel allows for flexibility by supporting various types of keystone jacks (Cat5e, Cat6, Cat6a, fibre optic), enabling customized configurations based on network needs and easy future upgrades.
- **Cable Management :** Built-in cable management features such as rear cable support help organize and maintain cables neatly, making troubleshooting and changes more efficient.

Product Specifications

Conforms to TIA-310-D design specifications

1U 19" Rack mountable

Modular design for easy configuration

Earthing lug for grounding and bonding

Pre-labelled ports 1 to 24 for easy identification and setup

Suitable for Globalsix snap in Keystone Jacks
